# PUMA 280

High Productivity Turning Center

# High Performance and Heavy Duty Turning Center

Combining rigid slant bed construction with advanced technology for superior machining of mid to large sized workpieces.

## PUMA 280

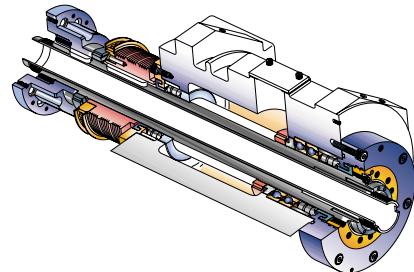

## Main Spindle

**Max. spindle speed Motor (30min)**  
**3500 r/min 22 kW**

### Main Spindle

Both main and sub spindle have characteristic as integral motor spindles that are whole covered with each oil cooling system to ensure remarkable range of applications from heavy duty cutting with high power at low speed to fine to finish cutting at high speed and optimize thermal displacement.

### Headstock and Spindle

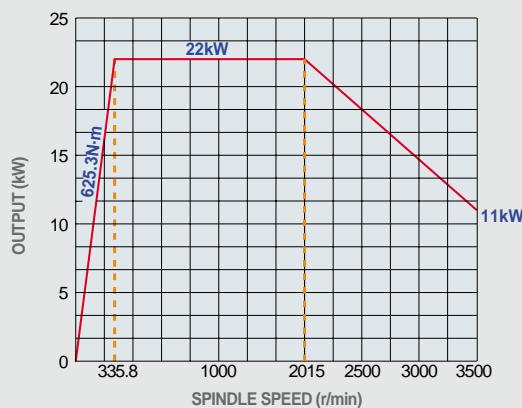

The powerful spindle motor enables heavy stock removal, reducing the number of roughing passes required.

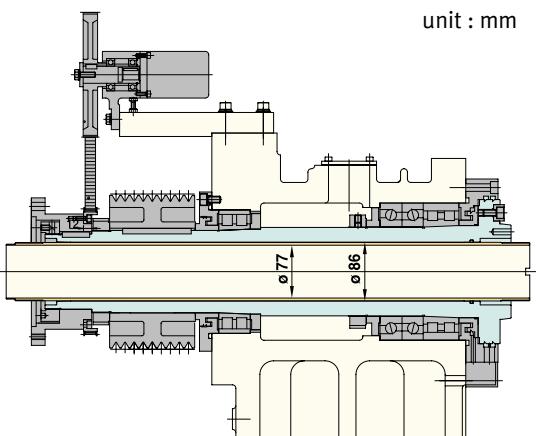

## Power-Torque Diagram Main Spindle

Spindle speed range : 3500 r/min

Motor power : 22 kW

### Cross Section of Main Spindle

## Turret

Index time (1-station swivel)

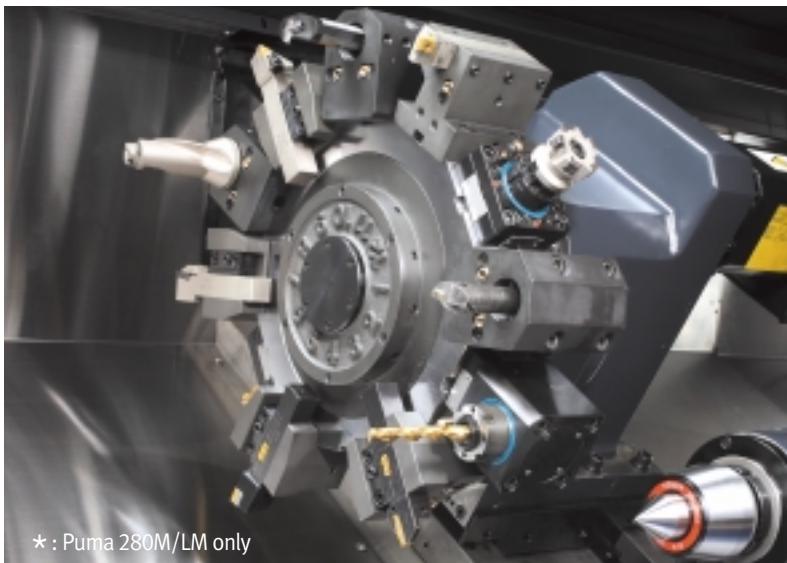

**0.15 s**

No. of tool station

**10 stations**

The heavy duty design provides unsurpassed rigidity for heavy stock removal, fine surface finishes, long boring bar overhang ratios, and extended tool life. Turret indexing is direct and bi-directional, with a 0.15 second next station index time. Turning tools are securely attached to the turret by wedge clamps.

## Rotary Tool Turret\*

\* : Puma 280M/LM only

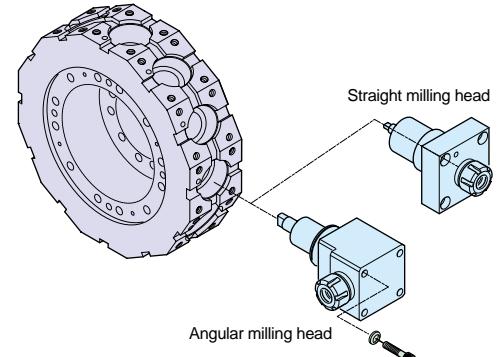

No. of tool station

**12 stations**

12 tool stations turret(BMT55P) make it possible to complete complicated parts requiring many tools in just one set-up. Reliable servo driven turrets reduce the total cycle time required to machine parts.

## Radial BMT Turret

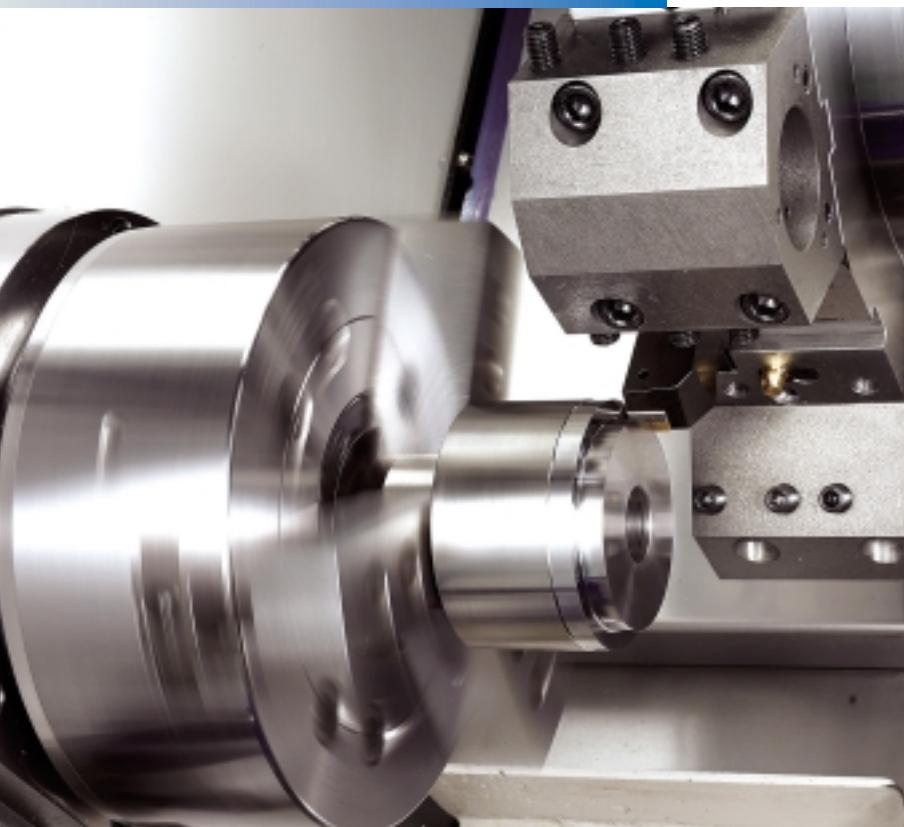

## Rotary tool spindle power-torque diagram

Spindle speed range : 5000 r/min

## Machine Capacity

### Heavy-Duty Cutting

Chip removal rate

**799 cm<sup>3</sup>/min**

Cutting depth

**9 mm**

\* Actual results may differ depending on cutting conditions.

## Working Range

A : Max. turning dia.

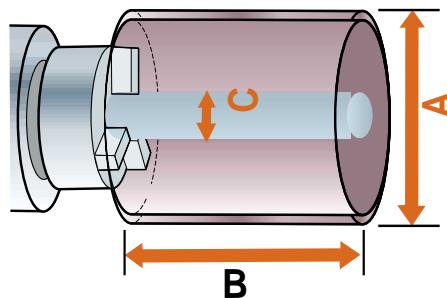

**420/410\*** mm

B : Max. turning length

**658/610\*** [1078/1030\*] mm

C : Max. bar working dia.

**76** mm

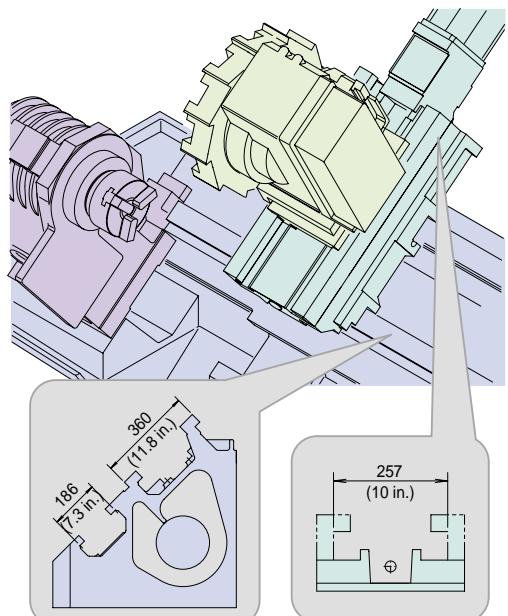

\* on M type machine, [ ] : long bed machine

### Slideway Width

X-axis : **257** mm

Z-axis : **360** mm

# Additional Equipment

## Heavy-Duty Cutting

Widely spaced guide ways and a heavy duty tail stock body ensure ample rigidity. The tail stock body can be positioned with traction bar that engages with the carriage. The traction bar movement and body clamping are programmable.

## Standard Feature

Coolant supply equipment	Hydraulic chuck and actuating cylinder	Manuals
Foot switch	Hydraulic power unit	Safety precaution name plates
Front door Safety Lock	Levelling jack screw & plates	Soft jaws (total)
Full enclosure chip and coolant shield	Live tail center	Standard tooling kit (tool holder & boring sleeve)
Hand tool kit (including small tool for operations)	Lubrication equipment	Work light
	Manual Tail Stock	

## Optional Feature

Air blast for chuck jaw cleaning	Coolant temperature control unit	Pressure switch for chucking pressure check
Automatic door	Dual chucking pressure	Proximity switches for chuck clamp detection
Automatic door with safety device	Electric power transformer	Proximity switches for quill position detection
Bar feeder interface	Hardened & ground jaws	Signal tower (Red, Yellow, Green)
Built-in center (MT#4)	Hyd. steady rest (SLU 1/2/B3.1)	Special chucks
Chip conveyor	Parts catcher (on M type)	Tool monitoring system
Chip bucket	Parts conveyor	Tool pre-setter (hydraulic type)
